Apple Laser Toner Cartridges

Features

- Engineered for optimum results when using Apple LaserWriter and other leading desktop laser printers. (Check the Apple Laser Cartridge Cross-Reference Guide for details.)
- Manufactured to meet or exceed original equipment specifications.
- Creates the sharpest text, cleanest whites, most fade-free blacks, and smoothest gray-scale images that your print engine can deliver.
- Helps you get the best output from Apple LaserWriter printers with PhotoGrade and FinePrint print-enhancement technologies.
- A postage-paid return mailer is included with many cartridges, making it easy to recycle your used cartridge.

For excellent laser printer output, here's some valuable input: Equip your laser printer with a genuine Apple laser toner print cartridge, available from your authorized Apple reseller.

If you own an Apple LaserWriter printer, you probably already know that a genuine Apple cartridge is the best way to look your best in print. What you may not already know is that Apple cartridges are compatible with most other popular brands of laser printers, too. So whether you use a printer made by HP, Brother, or any of more than two dozen other manufacturers, an Apple cartridge will give you every bit of the resolution and quality your print engine can deliver.

Every Apple laser toner print cartridge is manufactured to meet or exceed original equipment manufacturers' specifications. And

that's your assurance of cleaner whites, blacker blacks, richer graphics and smoother gray-scale output from your printer.

If you're using an Apple LaserWriter printer, things will start looking even better. Apple toner cartridges mean graphically superior output, especially from LaserWriter printers equipped with FinePrint, PhotoGrade, and other Apple print-enhancement technologies.

The best news of all is that Apple printer cartridges are very competitively priced—in quantities from one to one thousand or more. Your authorized Apple reseller can give you full details. It only makes sense: To get the best out of your laser printer, you need the best cartridge inside—and that means a genuine Apple laser toner print cartridge.
