### 1.2 Workbench Boot Pictures '95 for AmigaOS 2.0 - 3.1 - Introduction

Introduction

-----  
After the great success of the first series Workbench Boot Pictures '95,

---

I am proud to present Version 2.0!

This volume contains boot pictures with the Workbench '95 theme for AmigaOS's 2.0, 2.1, 3.0 and 3.1. After positive feedback from the first collection and suggestions to have them converted for all AmigaOS Versions, I decided to make a collection of pictures which would be applicable all major OS versions!

Workbench Boot Pictures are simply a collection of 16/256 colour IFF pictures for use with Joseph Lunks fabulous utility 'BootScreen' and program alike (PicBoot), to display a nice start-up image while your Hard Disk is booting.

'BootScreen' is a program which allows you to display an IFF picture while the hard drive is booting, much like the Microsoft Windows logo on the IBM's.

I was influenced to draw these pictures after seeing the "rip-off" Microsoft Boot Pictures that were floating around and I thought the Amiga deserved it's own exclusive Boot Screens.

So, I started work on some Boot Pictures that was exclusively "Amiga", and related more to the Amiga OS, with this collection including pictures for the latest Aniga Operating System, AmigaOS 3.1.

These pictures were drawn by hand exclusively with Deluxe Paint V with colour touch ups and effects done with Art Department Professional 2.1.3.

Hope you enjoy them :-)

-----

---

To use these pictures you will need:

- \* Either A1500/A2000/A2500/A3000 (ECS/OCS/Graphics Card)  
or  
A1200/A4000 (AGA/Graphics Card)
- \* OS 2.0 or better
- \* A Hard Disk
- \* 'BootScreen' Version 2.2+ by Joseph Luk (or equivalent).

'BootScreen' is available on Aminet in the utils/boot directory.

## 1.5 Workbench Boot Pictures '95 for AmigaOS 2.0 - 3.1 - Installation

### Installation

-----

Firstly, if you have not done so already, you will need to install 'BootScreen', follow the instructions accompanied with the program related the Install procedure.

After extracting the WB\_BootPics95Any.lha file (well you must of got this far if you are reading this guide!...), you will see a number of AmigaOS.. files, choose the pictures you want and copy them to your SYS:Prefs/Presets directory. You can do this from the CLI by typing;

```
copy <path containing WB BootPics directory> SYS:Prefs/Presets
```

Or alternatively using a Disk Management Program Like Directory Opus.

After copying these files, load the BootScreen Prefs program in the Prefs directory of your SYS: partition and choose the desired Boot Screen Picture. You can choose the 'Test' Gadget to preview the picture you want, then press 'Save' for BootScreen to save your options.

And thats all there is to it!

So next time you boot you machine, your desired boot picture will be displayed.

## 1.6 Workbench Boot Pictures '95 for AmigaOS 2.0- 3.1 - Acknowledgments

### Acknowledgments

-----

---

I would like to thank Joseph Luk for producing a fabulous program and to all the authors of similar programs.

I would also like to thank all the Amiga users out there in their kind feedback and suggestions on my previous four distributions of Workbench Boot Pictures for the Amiga.

I would also like to thank Urban Mueller at Aminet for making my pictures publically available on the Aminet CD Collections.
