| 1.6 | Versions... | 2 |

Usage: SnatchDIZ FILE/A,S=SUPPRESS/S
 =====

For example: "SnatchDIZ dh0:down/PPLAY41.LZX S K" will give you

```
-----
Power Player 4.1 Final Omega Version
* Latest Update! *
-----
```

This extracts and shows the file_id.diz and suppresses the credits and the filetype indicator.

WARNINGS: - SnatchDIZ is cli-only so don't start from Workbench!

1.4 You got this crap...

You need:

- an AMIGA w/Kick 2.04+ (as always).
- the lha-, lzx- and UNzip-executable placed in your path.
 A working UNzip is included in the SnatchDIZ-archive.

That's it.

1.5 Hallöle to...

```

all SHOOT members
    CAFFEiNE
        OMEN
STEELER and the rest/PHANTASM (thanks for the bug reports)
    Flake/TRSI
    MAVE/CRYSTAL
```

1.6 Versions...

V0.9: - not released but seems to work properly.

V1.0: 1st release, 31.3.95 (CAFFEINE)
 - added filetype indicator and the SUPPRESS option.
 - 1st release (under CAFFEiNE label)!

V2.0: 2nd release, 19.4.95 (SUPREME)
 - added own routine for search in DMSs (MUCH FASTER than DMS VIEWDIZ)
 - optimized search in executables A LOT!

V2.1: (no public release)
 - added own routine for search in GIFs (MUCH FASTER than GIFDESC)
 - SnatchDIZ is now reentrant and can be made resident (PURE option)

- removed KEEPDIZ option because it was unnecessary at all
- now checks if dos.library is >= V36
- no longer crunched. V2.0 sometimes crashed on 040 systems due to the used packer (CrunchMania V1.9)

V2.2: 3rd release, 19.7.95 (SHOOT) :-)

- fixed bug with filenames containing spaces/wildcards
 - I was told SnatchDIZ even handles JPGs, check it out yourself
-
