Chapter 1

Connect

1.1 History

3.0 -> 3.5

2.6 -> 3.0

2.5 -> 2.6

2.3 -> 2.5

2.1 -> 2.3

2.0 -> 2.1

1.0 -> 2.0

0? -> 1.0

1.2 Change 3.5

- When a devices was entered, which has less chars then the old one, the rest of the old Device was still standing in the StringGadget
- Sometimes Connect crashed, when a Requester should open

- Tabulatorkey-Cycling added (I forgot.. sorry)
- Removed NewString.mcc
- Some optimations done

1.3 Changes 3.0

- ConnectPrefs: Changed Gui to Mui

1.4 Changes 2.3

- ConnectPrefs: XOn/XOff-Gadget will locked, when the RTS-CTS Flag is set and also switched off.
- ConnectPrefs: PullDownMenu build in (Save and Open at time without function)
- ConnectPrefs: You can select the TaskPri
- ConnectPrefs: You can switch a 'Quit-Requester' on for quitting Connect
- Connect: When an Error at opening the Device occurs, the Error will shown specily (i.e. an other Device has opened -> Message: Device Busy)
- Connect: Changed for the new Config
- Written an english Guide.File (sorry for my broken and ugly english)

1.5 Changes 1.00

- This Version was absolutly bullshit. It was the first Version and was at the SerTrans Archive included.

1.6 Changes 2.0

- Completly new written!

1.7 Changes 2.1

- Bug: The received Datas are not send correctly to the 2nd Device :-(

1.8 Changes 2.5

- Localized (please translate if you like to other languages :))
 - Monitoring possible, just enter for example: CON:0/0//120/ConnectOutput/... and all what comes thru the devices will shown on the Consolewindow. Also you can enter a File... but WARNING! Monitoring will slow down! So, be careful with this option! To switch of the Monitor, just Clear
-

- the StringGadget, where the Entry is in
- MEGA Bug at ConnectPrefs: Closebutton is working now ;)
- Gadget for CarrierCheck. So if you try to quit Connect, and the CarrierCheck is enabled Connect will ask befor.
- Now you can Disable und Enable Connect via Exchange

1.9 Changes 2.3

- ConnectPrefs: XOn/XOff-Gadget wird gesperrt, sobald das RTS-CTS Flag gesetzt wird und gleichzeitig abgeschaltet.
- ConnectPrefs: PullDownMenu eingebaut (Save und Open laufen noch nicht, hatte bisher kein Bock drauf)
- ConnectPrefs: TaskPriorität kann eingestellt werden
- ConnectPrefs: Es kann eingestellt werden, ob ein Requester vorm Beenden angezeigt werden soll.
- Connect: Wenn beim DeviceÖffnen ein Fehler auftritt, wird der Fehler auch genau angezeigt. 'Konnte Device n nicht öffnen' war nicht so der Hit.
- Connect: Angepasst auf neue Prefs

1.10 Changes 1.00

- An die Version kann ich mich nur noch mit Grauen zurueckerinnern. War aber auch die erste Version (lag bei Sertrans dabei) und lief auch nur mit einem Kanal je Device...

1.11 Changes 2.0

- Komplett neu programmiert!

1.12 Changes 2.1

- Bug: Die empfangenen Daten wurden nicht richtig zum zweiten Device gesendet :-(

1.13 Changes 2.6

- Megalittle Bug fixed
 - Catalogs to Archive added
-
