Chapter 1

dtpic

1.1 dtpic_plugin: Introduction

dtpic_plugin

by Will Harwood <147800.97@swansea.ac.uk>

This is FREeware. This little pictures were found in a dank, dark corner of my harddrive and I have no idea of where they originally came from - hope you don't mind me using them!

Do you want to easily stick a nice picture into your GUIs? Would you like it to remap its palette? Would you like to load it through datatypes? Do you mind if it takes ages to load? Would you like the option for it to scale? Then dtpic is for you.

Constructor

History

Author

Please note that this documentation isn't really finished, but everything necessary for using the plugin is here.

1.2 dtpic_plugin: Constructors / Destructor

Constructor

init(tags:PTR TO tagitem)

The only currently defined tags are:

PTA_DTPic_Filename

```
PTA_DTPic_Scale
```

So for creating a non-scalable picture use:

```
DEF pic:PTR TO text_plugin  
NEW pic.init([PTA_DTPic_Filename, 'bls', PLA_DTPic_Scale, FALSE, TAG_DONE])
```

1.3 dtpic_plugin: History

v1.0 (3.2.98)

- o Wrote the plugin yesturday, sent it off today

1.4 dtpic_plugin: Author

Hello, I'm Will Harwood, doing computer science at Swansea Uni.
If you want to contact me for any reason then you can e-mail
my Uni address at:

147800.97@swansea.ac.uk

I usually check this every day, so if you don't receive a reply
fairly quickly you can bet that the server has fouled up again
and I didn't get the message, so please sent it again!

If you want to contact me out of term time (24 June-24 September,
12 December-12 January, 20 March-20 April) then you can post to:

618 Dorchester Road,
Weymouth,
Dorset.
DT3 5LH

...but obviously e-mail is preferable.
