### 1.2 Welcome to Dizzer...

---

---

Welcome to Dizzer

---

---

Welcome again to the forth release of Dizzer, the last version was only released about 8 hrs ago but I have added some interesting features to this latest version. It now lets you add File\_id.diz to Lha, Lzx and txt files. No hard work is required and it is very easy to use also the end product looks great!

---

### 1.3 Installing Dizzer...

---

---

How to install Dizzer

---

---

Simple... just copy dizzer to your required draw. Vola!!!

Back to the [Main Menu...](#)

### 1.4 The Requirements...

---

---

Dizzer requirements

---

---

· Lha in C:

· Lzx in C:

### 1.5 Tested on...

---

---

Tested on...

---

---

Dizzer was tested on the following computers :-

Amiga 1200/030-50Mhz/8Mb Ram/710Mb HD

Amiga 1200/710Mb HD

### 1.6 The future of Dizzer...

---

---

What does the future hold?

---

---

---

- Allow multiple and self created headers
- Better interface
- More or less than 3 lines
- Other compression formats like DMS and Zip

And any of your suggestions!!!

## 1.7 The history of Dizzer...

---

---

The history of Dizzer

---

---

- V1.0 (05/03/98) - First ever release of Dizzer [NEVER RELEASED]
- V1.1 (07/03/98) - File requester to pack File\_ID.DIZ into  
Cancel Bug fixed, If you choose cancel on the  
last version it would archive the whole draw,  
now the program quits!
- V1.11 (07/03/98) - Bigger and better diz, more letters across  
allowed. When flicking from the lhaing screen  
back to the diz editor screen it would go  
all funny, now fixed.
- V1.2 (07/03/98) - Now pack dizes into LZX and txt files.
