Diz-Explorer AmigaGuide Filelist

1.1   Diz-Explorer Version4 AmigaGuide-Filelist Creator

```
-------------------------------------------------------------------
  Guide created with the Explorer4 - AmigaGuide® CD Creator!
           © 1998 by Jochen Grus & Martin Gentile
-------------------------------------------------------------------

                 Filelist of: CD0:Aminet/util/pack/

If you don't want to unpack DMS files to DF0: you must mount an
alternative device like RAD.

-------------------------------------------------------------------
 Mount RAD
 "}    Mount FF0
 "}    Mount FF1
 "}    Mount FF2
 "}    Mount FF3
 "}
-------------------------------------------------------------------

            Now you must assign the selected Device

 Assign RAD
 "}   Assign FF0
 "}   Assign FF1
 "}   Assign FF2
 "}   Assign FF3
 "}

======================= Description =========================

Short: V1.40 (de)crunching handler for XPK
Authors: bombadil@diku.dk, MC6489@mclink.it, tron@lyssa.pb.owl.de
Uploader: Dirk Stoecker <stoecker@rcs.urz.tu-dresden.de>
Version: 1.40
Type: util/pack
Replaces: util/pack/XFH1_39.lha

XFH-handler is a DOS handler which uses xpkmaster.library to provide
transparent access to compressed files in a given directory or partition.
All compression/decompression is done automatically by the handler when
files are read or written. Compression is optional and may be switched at
any time, allowing for fine control over storage of data. The compression
method may be changed at will. Decompression is always automatic, you
don't have to care about which compressor was used to create the files.

Changes since last release V1.39:
 - recompiled with new xpk includes and SAS 6.57

NOTE: I (Dirk Stoecker) will not spent any further work on this project.

Short: Text about xpk_Crypt.lha archive
Author: stoecker@rcs.urz.tu-dresden.de (Dirk Stoecker)
Uploader: stoecker@rcs.urz.tu-dresden.de (Dirk Stoecker)
Type: util/pack

The xpk_Crypt.lha archive cannot be found on world wide Aminet servers,
because of the American cryptography laws. So you have to get it from
German servers. The most important one is ftp.uni-paderborn.de. There it
is in /pub/aminet/util/crypt.

You can get it also on my WWW page
  http://rcs.urz.tu-dresden.de/~stoecker/xpkmaster.html
or direct with
  http://rcs.urz.tu-dresden.de/~stoecker/xpk_Crypt.lha

```
   http://rcs.urz.tu-dresden.de/~stoecker/xpk_Crypt.readme
but I do not know how long this page will exist.

Description
XPK is an interfacing standard between application programs and packer
libraries. All XPK application programs can apply any of the various XPK
compressors or encryptors to their data.

Distributability
XPK is copyrighted, but freely distributable for non-commercial use. Some
parts of XPK have a different legal status, ie. PD, GPL or shareware.

This part of the xpk distribution consists of all the cryptographic
libraries. It may be illegal to export these libraries from the USA,
therefore they are in a seperate archive, which should not be made
internationally available from the USA. We do not yet know of any
restrictions to the import or export of this archive from other countries.

Short:    V3.11 Compression package, developer's edition
Author:   Dirk Stoecker, Christian von Roques, Urban Dominik Mueller, ...
Uploader: stoecker@rcs.urz.tu-dresden.de (Dirk Stoecker)
Version:  3.11
Type:     util/pack

Description
XPK is an interfacing standard between application programs and packer
libraries. Every XPK application program can pack data with any XPK packer.

Distributability
XPK is copyrighted, but freely distributable for non-commercial use. Some
```

parts of XPK have a different legal status, ie. PD, GPL or shareware.

In this archive are all files, which are needed to create own xpk
applications.

How to install:
Copy the files to the include paths of your compiler/assembler systems.

Changed to last release:
cleaned up the release, corrected some little bugs in includes, added
HotHelp files, added some include files for SAS-C

Please contact me or any of the other authors stated in the docs:

======================== Description ==========================

Short: V3.11 Compression package, user's edition
Author: Dirk Stoecker, Christian von Roques, Urban Dominik Mueller, ...
Uploader: stoecker@rcs.urz.tu-dresden.de (Dirk Stoecker)
Version: 3.11
Type: util/pack

Description
XPK is an interfacing standard between application programs and packer
libraries. Every XPK application program can pack data with any XPK packer.

Distributability
XPK is copyrighted, but freely distributable for non-commercial use. Some
parts of XPK have a different legal status, ie. PD, GPL or shareware.

This is the main part of the xpk distribution. In this archiv are all the
files you really need.

How to install these files:
Copy the contents of all the directories to the corresponding directories
on your system. If you have a 68020 or higher you can also copy the files
in the Libs_68020+ to your Libs directory. These files should replace files
with the same name in Libs directory, which are for all 680x0.

An Installer script will come soon, then the installation will be a lot
easier.

NOTE: Starting with version 3.10 I (Dirk Stoecker) am the programmer of
xpkmaster.library. I continue the work of Urban Dominik Mueller and
Christian von Roques with their permission!

Changed to last release:
cleaned up the release, removed XFH, added catalog files, no important
changes at the master library, recompiled the Shell programs

Try WWW address http://rcs.urz.tu-dresden.de/~stoecker/xpkmaster.html. Here
all files are accessable (also the xpk_Crypt.lha archive). This page is
still in beta phase so report all problems, errors and ideas. Tell me links
to other xpk related pages so this page can become a main xpk page. I may
update the html files, but you have to create the page!

Please contact me or any of the other authors stated in the docs:
