

Now Worldwide Delivery Overnight!

TXP is now offering overnight delivery to most major business centers in Western Europe. For the special introductory rate of \$15.95, TXP will pick up a special 8-ounce TXP-packet from several major U.S. cities and deliver it to many European cities before the end of the next business day.

Around the World Delivery Overnight.

Our Priority Delivery to Europe is only a part of the line-up of improved and expanded services at TXP. Our enlarged fleet of DC-10 and 727 jets will allow TXP to extend overnight air express services to Eastern Europe, South America, and the Orient. By the end of 1990, we will include Warsaw, Prague, Budapest, São Paulo, Caracas, Tokyo, Seoul, and Shanghai in our Priority Delivery network of cities.

A Less Foreign Look to International Shipments.

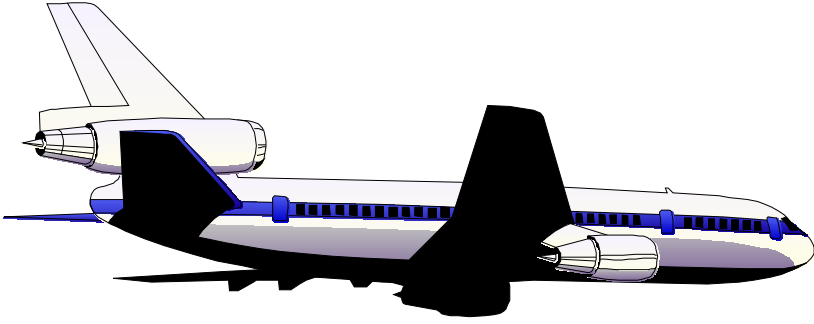

We have made international deliveries easier by redesigning the TXP-Waybill. This new form reduces paperwork and minimizes customs delays. With the streamlined TX-Waybill, which serves as an

airway bill and export declaration form, you can put all of the information necessary for overseas shipments on one document. And best of all, this simplified form only takes a few minutes to complete.

We can also ship some cosmetics and pharmaceuticals. These goods must meet strict packaging guidelines. Transportation restrictions of heavyweight shipments have also relaxed, so we're including packages and containers weighing 150-500 pounds in our Priority Delivery to Europe.

Some Things Never Change. You can rest assured that expansion doesn't mean giving up the quick and dependable service you've enjoyed from the world's fastest express mail courier. We still provide 24-hour toll-free customer service for any questions you may

have. Call us today at 1-800-NODELAY.
