Figures, Tables, and Listings xi

Preface

About This Book xv

Format of a Typical Chapter xvi
Conventions Used in This Book xvii
 Special Fonts xvii
 Types of Notes xvii
Development Environment xvii

Chapter 1

Introduction to QuickTime 1-1

QuickTime Concepts 1-3
 Movies and Media Data Structures 1-3
 Components 1-3
 Image Compression 1-4
 Time 1-4
The QuickTime Architecture 1-5
 The Movie Toolbox 1-6
 The Image Compression Manager 1-6
 The Component Manager 1-6
 QuickTime Components 1-7
Using QuickTime 1-8
 Playing Movies 1-8
 Creating and Editing Movies 1-10
 Movie-Editing Applications 1-12
 Movie-Creating Applications 1-13

Chapter 2

Movie Toolbox 2-1

Introduction to Movies 2-5
 Time and the Movie Toolbox 2-5
 Time Coordinate Systems 2-6
 Time Bases 2-8
 Movies 2-9
 Tracks 2-12
 Media Structures 2-13
About Movies 2-14
 Movie Characteristics 2-15
 Track Characteristics 2-17

Media Characteristics	2-18
Spatial Properties	2-20
The Transformation Matrix	2-26
Audio Properties	2-29
Sound Playback	2-29
Adding Sound to Video	2-30
Sound Data Formats	2-31
Data Interchange	2-32
Movies on the Clipboard	2-32
Movies in Files	2-32
Using the Movie Toolbox	2-32
Determining Whether the Movie Toolbox Is Installed	2-33
Getting Ready to Work With Movies	2-35
Getting a Movie From a File	2-35
Playing Movies With a Movie Controller	2-38
Playing a Movie	2-41
Movies and the Scrap	2-45
Creating a Movie	2-45
A Sample Program for Creating a Movie	2-46
A Sample Function for Creating and Opening a Movie File	2-47
A Sample Function for Creating a Video Track in a New Movie	2-48
A Sample Function for Adding Video Samples to a Media	2-50
A Sample Function for Creating Video Data for a Movie	2-52
A Sample Function for Creating a Sound Track	2-52
A Sample Function for Creating a Sound Description Structure	2-55
Parsing a Sound Resource	2-59
Saving Movies in Movie Files	2-61
Using Movies in Your Event Loop	2-62
The Movie Toolbox and System 6	2-63
The Alias Manager	2-64
The File Manager	2-64
Previewing Files	2-65
Previewing Files in System 6 Using Standard File Reply Structures	2-65
Customizing Your Interface in System 6	2-67
Previewing Files in System 7 Using Standard File Reply Structures	2-68
Customizing Your Interface in System 7	2-70
Using Application-Defined Functions	2-71
Working With Movie Spatial Characteristics	2-73
Movie Toolbox Reference	2-76
Data Types	2-76
Movie Identifiers	2-77
The Time Structure	2-77
The Fixed-Point and Fixed-Rectangle Structures	2-78
The Sound Description Structure	2-79

Functions for Getting and Playing Movies	2-81
Initializing the Movie Toolbox	2-82
Error Functions	2-84
Movie Functions	2-87
Saving Movies	2-100
Controlling Movie Playback	2-111
Movie Posters and Movie Previews	2-114
Movies and Your Event Loop	2-124
Preferred Movie Settings	2-130
Enhancing Movie Playback Performance	2-134
Disabling Movies and Tracks	2-145
Generating Pictures From Movies	2-148
Creating Tracks and Media Structures	2-150
Working With Progress and Cover Functions	2-155
Functions That Modify Movie Properties	2-157
Working With Movie Spatial Characteristics	2-158
Working With Sound Volume	2-181
Working with Movie Time	2-184
Working With Track Time	2-191
Working With Media Time	2-194
Finding Interesting Times	2-196
Locating a Movie's Tracks and Media Structures	2-202
Working With Alternate Tracks	2-207
Working With Data References	2-215
Determining Movie Creation and Modification Time	2-219
Working With Media Samples	2-222
Working With Movie User Data	2-230
Functions for Editing Movies	2-242
Editing Movies	2-243
Undo for Movies	2-254
Low-Level Movie-Editing Functions	2-257
Editing Tracks	2-262
Undo for Tracks	2-268
Adding Samples to Media Structures	2-271
Media Functions	2-281
Selecting Media Handlers	2-282
Video Media Handler Functions	2-287
Sound Media Handler Functions	2-288
Text Media Handler Functions	2-290
Functions for Creating File Previews	2-301
Functions for Displaying File Previews	2-304
Time Base Functions	2-315
Creating and Disposing of Time Bases	2-315
Working With Time Base Values	2-322
Working With Times	2-332
Time Base Callback Functions	2-335
Matrix Functions	2-341

Application-Defined Functions	2-354
Progress Functions	2-354
Cover Functions	2-357
Error-Notification Functions	2-358
Movie Callout Functions	2-359
File Filter Functions	2-360
Custom Dialog Functions	2-360
Modal-Dialog Filter Functions	2-362
Standard File Activation Functions	2-363
Callback Event Functions	2-364
Text Functions	2-364
Summary of the Movie Toolbox	2-366
C Summary	2-366
Constants	2-366
Data Types	2-369
Functions for Getting and Playing Movies	2-378
Functions That Modify Movie Properties	2-383
Functions for Editing Movies	2-389
Media Functions	2-392
Functions for Creating File Previews	2-394
Functions for Displaying File Previews	2-394
Time Base Functions	2-395
Matrix Functions	2-397
Application-Defined Functions	2-398
Pascal Summary	2-399
Constants	2-399
Data Types	2-404
Routines for Getting and Playing Movies	2-408
Routines That Modify Movie Properties	2-413
Routines for Editing Movies	2-418
Media Routines	2-421
Routines for Creating File Previews	2-423
Routines for Displaying File Previews	2-423
Time Base Routines	2-423
Matrix Routines	2-425
Application-Defined Routines	2-426
Result Codes	2-427

Chapter 3	Image Compression Manager	3-1
-----------	----------------------------------	-----

Introduction to the Image Compression Manager	3-5
Data That Is Suitable for Compression	3-6
Storing Images	3-8
About Image Compression	3-8
Image-Compression Characteristics	3-8
Compression Ratio	3-8

Compression Speed	3-9
Image Quality	3-9
Compressors Supplied by Apple	3-9
The Photo Compressor	3-10
The Video Compressor	3-10
The Compact Video Compressor	3-11
The Animation Compressor	3-11
The Graphics Compressor	3-11
The Raw Compressor	3-12
Types of Images Suitable for Different Compressors	3-13
Using the Image Compression Manager	3-28
Getting Information About Compressors and Compressed Data	3-28
Working With Pictures	3-28
Compressing Images	3-31
Decompressing Images	3-34
Compressing Sequences	3-35
Decompressing Sequences	3-37
Decompressing Still Images From a Sequence	3-38
Using Screen Buffers and Image Buffers	3-38
A Sample Program for Compressing and Decompressing a Sequence of Images	3-39
A Sample Function for Saving a Sequence of Images to a Disk File	3-40
A Sample Function for Creating, Compressing, and Drawing a Sequence of Images	3-42
A Sample Function for Decompressing and Playing Back a Sequence From a Disk File	3-46
Spooling Compressed Data	3-48
Banding and Extending Images	3-49
Defining Key Frame Rates	3-51
Fast Dithering	3-51
Understanding Compressor Components	3-52
Image Compression Manager Reference	3-53
Data Types	3-53
The Image Description Structure	3-53
The Compressor Information Structure	3-56
The Compressor Name Structure	3-59
The Compressor Name List Structure	3-60
Compression Quality Constants	3-61
Image Compression Manager Function Control Flags	3-62
Image Compression Manager Functions	3-65
Getting Information About Compressor Components	3-66
Getting Information About Compressed Data	3-71
Working With Images	3-77
Working With Pictures and PICT Files	3-92
Making Thumbnail Pictures	3-107
Working With Sequences	3-110

Changing Sequence-Compression Parameters	3-124
Constraining Compressed Data	3-131
Changing Sequence-Decompression Parameters	3-133
Working With the StdPix Function	3-141
Aligning Windows	3-146
Working With Graphics Devices and Graphics Worlds	3-151
Application-Defined Functions	3-152
Data-Loading Functions	3-153
Data-Unloading Functions	3-154
Progress Functions	3-156
Completion Functions	3-158
Alignment Functions	3-159
Summary of the Image Compression Manager	3-161
C Summary	3-161
Constants	3-161
Data Types	3-163
Image Compression Manager Functions	3-167
Application-Defined Functions	3-173
Pascal Summary	3-174
Constants	3-174
Data Types	3-176
Image Compression Manager Routines	3-179
Application-Defined Routines	3-185
Result Codes	3-186

Chapter 4 **Movie Resource Formats** 4-1

Introduction to Movie Resources	4-3
Storing Movies in Files	4-4
Atoms	4-5
Atom Types	4-6
The Layout of a QuickTime Atom	4-7
Overview of the Movie Resource Atom	4-8
Movie Atoms	4-11
Movie Header Atoms	4-12
Track Atoms	4-14
Track Header Atoms	4-15
Media Atoms	4-17
Media Header Atoms	4-18
Handler Reference Atoms	4-19
User-Defined Data Atoms	4-20
Clipping Atoms	4-23
Clipping Region Atoms	4-23
Track Matte Atoms	4-24
Compressed Matte Atoms	4-24
Edit Atoms	4-25

Edit List Atoms	4-26
Media Information Atoms	4-27
Video Media Information Atoms	4-27
Video Media Information Header Atoms	4-28
Sound Media Information Atoms	4-29
Sound Media Information Header Atoms	4-30
Data Information Atoms	4-31
Data Reference Atoms	4-33
An Introduction to Samples	4-33
Sample Table Atoms	4-34
Sample Description Atoms	4-36
Time-to-Sample Atoms	4-37
Sync Sample Atoms	4-39
Sample-to-Chunk Atoms	4-40
Sample Size Atoms	4-42
Chunk Offset Atoms	4-43
Shadow Sync Atoms	4-45
Using Media Information Atoms	4-46
Finding a Sample	4-47
Finding a Key Frame	4-47

Glossary GL-1
