### 1.1 No title

AUTOGUIDE CREATOR VERSION 5.00

WHAT~IS~?

Functions

Author

This is a Public Domain program, not for resale.

You can copy the program & manual guide, but not modify thats

ATTENTION PLEASE !!!

This version isn't compatible with old versions of program

You need rewrite all for use the new function of this program

(eg. » DELETE)

### 1.2 chiarimenti

AUTOGUIDE CREATOR VER. 5.00

Gadget »

NEW~AUTOGUIDE

ADD~~AUTODOC

SINTAX~CTR

DELETE~GUIDE

OPTIONS

GO - Start function

QUIT - END PROGRAM

### 1.3 programma

AUTOGUIDE CREATOR VER. 5.00

This select the requester for drawer of all:

- INCLUDE

- FILE \*.FD

- FILE AUTODOC

- DIR GUIDE DESTINATION

QUIT - END PROGRAM

### 1.4 SCELTA VARIE DIRECTORY

THE SINTAX CONTROL FOR FILE AUTODOC

This function make a sintax control on every \*.doc text} file into Autodoc Directory

It write the error in the "control~window" into the program's main window and into a XXX.ERR file in the Guide Directory (XXX="name of TOC").

AUTODOC SINTAX:

Here is how to write the autodoc file:

N.B.: The Table of Contents is not obligatory for this version

First line (obligatory) TABLE OF CONTENTS, [RET], [RET]

doc\_name.category/function1\_name [RET] doc\_name.category/function2\_name [RET]

.... doc\_name.category/last\_function\_name [FF]

doc\_name.category/function\_name [TAB & or SPACE]

The double title of function is not obligatory

doc\_name.category/function\_name [RET]

(follow function's description)

.....

at end description [FF]

The last function is also the End Of File shine} text}

WARNING !! WARNING !!

Don't append "()" to function name into Table of Contents !!!

This sytem don't accept Function-Name (in descrpitory part) without the prefix XXX.YYY/ The suffix "()" anywhere into doc file is interpreted as function's keyword. You must append that if want link function to amigaguide file

where is

- XXX = name of file

- YYY = category of file (library,device, resource, ecc...)

WITHOUT THAT THE CONTROL WINDOW SHOW:

- SINTAX ERROR IN DESCRIPTION FUNCTION (without function name !!)

## 1.5 grassetto

### NEW AUTOGUIDE

This is the main function,

It:           1st           -           make sintax control on all autodoc files into AUTODOC'S DIRECTORY (if error report, then stop function and write XXX.ERR file & show error into " control~window ")

              2nd           -           Load & elaborate Guide file from every Autodoc File

              3rd           -           Ask the icon for TOC file (from Sys:envarc directory)

The TOC file (choose name of that from Text-gadget) is an general index of guide file (alfabetically & class sorted) & analytic Index for all functions & structures (in case of Assembler language, also macro's index). You can choose Assembler or C & C++ language from OPTIONS.

Into this new version the program select category of autodoc file from description on FD files (You must choose its directory from main window). If .fd file not exist, this program search into autodoc the category, if not found, then select OTHER category.

## 1.6 sintassi

OPTIONS

BOLD WORD

Only for amigaguide.library » 39.00 !!!

The listview display the words that will show bold into Guide text.

SKIPPED WORDS

The listview display the words that don't show into Function's Index of TOC file (That will show only on Index of Function of single Guide file )

For both, You can choose if change, delete or add new word, with the text-gadget after listview.

LANGUAGE

You can choose for C or Assembler language with mx-gagdget

At last, If You choose CANCEL, nothingh will change !!!

If You choose OK, the program create an AUTOGUIDE.PREFS FILE into SYS: directory. That is an ASCII file where are the bold words, the skipped & language (i- assembler or h- C). You can modify this file for change the option into program (only before start the program)

## 1.7 ADD AUTOGUIDE

ADD AUTODOC

It add new or change old guide file into guide's directory & TOC file.

If the Guide file it's already present, a system requester will ask for change that file (OK or Cancel option). All new Include & Autodoc file must lie into same Directory. The program copy the new include files in a directory named "OTHER", into the original Include's directory.

## 1.8 finestra di controllo.

---

## WINDOW CONTROL

This is a listview gadget, it show:

- current elaboration
- list of error report

## 1.9 Descrizione generale

AUTOGUIDE-CREATOR versione 4.00

This program create a TOC file & related Guide file from AUTODOC files.

It don't need assegnation for path or drawer

It control syntax of \*.DOC files & create a guide ascii of sintax-error in DOC files

ALDO VINATTIERI

Via 1 Maggio 1/1,

44042 Cento (FE)

Italia

Fax            //44            51-6830063

I am working to a new nice version (6.00) of this program

with interface BGUI

## 1.11 DELETE GUIDE

This is a new  
option on my Autoguide-Creator

With this you choose old Autoguide TOC (Table Of Contents), and the program ask you the guide to delete.

Then the program delete the selected files & rewrite a new TOC (with a new toc.XREF)
