1.23 xmb(xxx).library

```
Name of the library : xmb<xxxx>.library

Description         : xmb<xxxx> is a set of libraries for handling
                      different message bases of BBS programs, so
                      it is possible to have one e.g. QWK door used
                      on all BBS sistems. Now, library isn't finished
                      yet, but there is high possibility that it would
                      be, and we would like to preregister the name.
