## statxref.doc

### 1.1 statxref.doc

XRef-Tools/StatXRef

XRef-Tools/StatXRef

\$VER: statxref.doc 1.5 (24.09.94)

#### NAME

StatXRef - outputs information of the current settings of the xref.library

#### TEMPLATE

FILES/S

#### FORMAT

StatXRef [FILES]

#### FUNCTION

This command outputs information about the current settings of the xref.library. The global path for xreffiles, the number of xref files in memory, the linelength and column number for the dynamic node layout. And optional if you specify the FILES switch, the information about the single xref file like the name, length , priority and the lock status.

#### INPUTS

FILES (BOOLEAN) - output detail information about the xref files

#### SEE ALSO

LoadXRef, ExpungeXRef, XRefAttrs

#### HISTORY

StatXRef 1.5 (24.9.94) :  
- category output no 15 charaters wide , instead of 10 charaters

StatXRef 1.4 (8.9.94) :  
- workbench support added

StatXRef 1.3 (9.7.94) :  
- Index and Global Path output added
