\$VER: expungexref.doc 1.7 (24.09.94)

NAME

ExpungeXRef - expunge a given file,category or all xreffiles

TEMPLATE

CATEGORY, FILE/K, FORCE/S, VERBOSE/S

FORMAT

ExpungeXRef [[CATEGORY] category] [FILE xreffile] [FORCE] [VERBOSE]

FUNCTION

this command expunges a/some xreffiles from memory.If no category or file is specified all xreffiles are removed. If you turn on the switch FORCE, xreffiles are also removed, which are locked.

INPUTS

CATEGORY (STRING) - category of xreffiles to expunge. Can be a pattern.

FILE (STRING) - only expunge the file given here

FORCE (BOOLEAN) - expunge also such files, which are protected via the LOCK mechanism

VERBOSE (BOOLEAN) - show each file, which is expunged !

EXAMPLE

the following example expunges only the xreffile mytools.xref in the global xref drawer , even it is locked or not :

```
ExpungeXRef FILE mytools.xref FORCE
```

SEE ALSO
