

RIP*tabs* Version 2.0

©1993, 1994 By Jonathan Carroll

Introduction

This ZIP file contains the large memory model (non-debug) version of the RipTABS library for use with Microsoft Visual C++ V1.0 . You need to get the complete RipTABS ZIP file to get the header file and documentation. Please note that this library works *only* with the RipTABS V2.0 package.

Install the complete RipTABS package and then copy the library that came with this ZIP file over the one that came with the complete version of RipTABS.
