Evaluation Upgrade

If you have an existing copy of TeleMagic Professional, TeleMagic for DOS, or TeleMagic Enterprise version 1.5, 2.x, or 3.x and wish to install an evaluation of the V4 upgrade, you may do so following these instructions. This will upgrade your current installation for a 45 day complimentary trial period. At the end of the evaluation period, you can either purchase an upgrade or restore a backup of your previous version. If you choose to purchase the upgrade, the changes you have made to your data while evaluating the product will be retained. (If you install an evaluation that is not an upgrade then purchase an upgrade, you will have to upgrade the previous product to apply your upgrade serial number. Any changes made to your evaluation copy will be lost.)

Important Notice: Be aware that after 45 days you will not be able to access the evaluation copy of TeleMagic without registering. If you decide not to register, you can restore your previous version of TeleMagic from backup. If you make any important changes to your records during the evaluation period, you should export them to a file that can be imported back into your restored backup installation should you decide not to upgrade. The export must be performed *before* the 45 days expires or you will not be able to access your records.

To Install the Evaluation Upgrade:

1. Insert the installation CD in your CD-ROM drive.
2. The setup program will launch.
- or** If the setup program does not automatically launch, select **Start, Run** from the taskbar to open the Run dialog box. In the **Open** field type D:\INSTALL.EXE (where D:\ is the drive letter of your CD-ROM drive) and click **OK**.
The TeleMagic Setup screen will open.
3. Select the Install/Upgrade TeleMagic V4 for Windows or add items to an existing V4 installation button.
The Welcome screen will open.
4. Carefully review and follow the information on this screen then click **Next>**.
5. At the Install Type screen, select Upgrade an existing installation to V4 evaluation (No Serial Number) and click **Next>**. The Installation Wizard will guide you through the rest of the upgrade process.
6. When you reach the Choose Destination Location screen, enter the path to the global TeleMagic directory.
When you complete the upgrade process, the installation specified in step 7 will be upgraded to V4 and will become unregistered.
