# TeleMagic Professional to Enterprise Conversion

The new Professional to Enterprise conversion is built into the installation program.  To convert your Professional installation and install Enterprise V4 at the same time, simply follow these instructions.

1. Place the TeleMagic installation CD in your CD-ROM drive.
   The installation program will launch.
**or** If the program does not launch, select **Start**, **Run** from the taskbar, enter D:\INSTALL.EXE and click **OK**. (Substitute the actual letter for your CD-ROM, if other than D.)
2. Select **Install/Upgrade TeleMagic Enterprise**.
3. Read the screen that opens. When you are satisfied, click **Next**.
4. Click **Upgrade an Existing Installation to V4 Evaluation** button.
5. Select `Windows Professional` and click **Next**.
6. If your TeleMagic Professional installation is somewhere other than the default, enter the path to your Professional installation or click **Browse** and browse for it. Click **Next** to continue.
7. Enter the Name and Company Name in the fields, if different from those offered. Click **Next** to continue.
8. Select the installation type from the three options. Click **Next** to continue.
9. If you want to change the location where TeleMagic V4 is to be installed from the default, click **Browse** and choose the folder. Or, if the folder does not exist, enter the path to the folder in the field provided. Click **Next** to continue.
10. Select the folder where TeleMagic icons should be installed, if different from the default. Click **Next** to continue.

The rest of the upgrade is conducted automatically. You will receive a message when the upgrade is complete.
