# 2.4 Reviewing Lessons

The "Review Lessons" feature lets you see all or selected lesson files assigned to a particular section or sub-section. For example, sub-section 2.2 has six lesson files assigned to it. If you were to click on "View Lessons" with 2.2 selected, you would view all six files, starting with the first. But if you clicked on "Review Lessons", you have the option to select only the files you wish to view.

1. Select the sub-section you wish to view.
2. Click on the "Review Lessons" button, or select "Review Lessons" from the "Action" menu, or press <Ctrl><R>.

File   Action   Administration   Help

View Lessons	Ctrl+L
View KeyNotes	Ctrl+S
Take Quiz	Ctrl+Q
Review Quiz Scores	Ctrl+U
Review Lessons	Ctrl+R
View All Lessons	Ctrl+A

LEARNING
Visual Basic 6.0
Level 2

2.0 Variables, Constants, Arrays, and User Defined Types
 2.1 Variables
 2.2 Scope of Variables
 2.3 Variable Declarations

Review Lessons

3. The "Lessons" dialog box appears. To view a lesson, highlight it and click "Select" or double click on the lesson name. Depending upon the type of lesson file you selected, you see either the Microsoft ActiveMovie or the Lotus ScreenCam Player. "Video" brings up the ActiveMovie player and "Demo" brings up the ScreenCam player.

Lessons

Format	Description
Video	2.2.1 Scope of Variables
Demo	2.2.2 Scope of Variables
Video	2.2.3 Scope of Variables
Demo	2.2.4 Scope of Variables
Video	2.2.5 Scope of Variables
Demo	2.2.6 Scope of Variables

Close

Microsoft Active Movie or ".mpg" file

ScreenCam file or ".scm" file

Select   Close

Displays lesson file

To close the window click the "Close" button or the little "X" in the upper right corner.
