Problems or Comments

Any bugs or ideas...

I want to fix or improve TaskView as best and as quickly as possible. If you find any problems or anything that makes TaskView unhandy to use please let me know. I have tested TaskView on several different computers and they have worked fine but yours could be the one that puts TaskView to the test.

When contacting me with a problem, I will need to know a few things:

- what version are you using
- what kind of computer are you using
- what operating system you are using
- what video card are you using
- and what the problem is

Contact me the following ways:

FAX	(717) 838-0290
COMPUSERVE	David Weaver 70570,3710
