Contents

Introduction

Description

Aardvark Pro for Windows is a   HyperText Markup Language (HTML) editor.

Aardvark Pro is, essentially, an ASCII editor not unlike a turbo charged version of Notepad.   The big difference is that it knows about HTML.

Many options have been included to speed up the process of creating HTML documents.   As soon as the program is loaded you are presented with a new template that has all of the main sections of a HTML document.   Simply start writing your document.

To include the predefined HTML labels (tags) in your document simply position the cursor where you wish to place the tag and click on the toolbar button or choose from the Insert Menu.   If the tag is a wrap around type ie. Heading, all you need to do is select the text to use and click.

Aardvark Pro doesn't require an expensive Web browser just to preview your document.   A simple preview facility is built-in.   Just click on the preview button or select File-Preview HTML (F9) and Aardvark Pro will show you what your document will look like when it's on the Web.

Features

- Multiple Document Interface.
- Built-in Wizards guide you through creating Documents, Tables and Forms.
- Save any document as a template and use the template to create a consistent look and feel in your pages.
- Use the URL library to store your frequently used URLs, then insert them into your documents with one click.
- The Project Manager provides a visual representation of your project and a quick way of opening all files in a project.
- Comprehensive Tool Bars provide one click access to all HTML directives.
- Preview and Test your HTML documents with the built-in preview function.
- Use Aardvarks Macro facility to create short cuts to regularly used phrases.
- Unique Plug-Ins keep the HTML up to date and allow you add your favourite commands.
- Support for HTML 1, 2 3 and Netscape extensions.
- Cut and Paste between documents.
- Use the Home Page Wizard to create your first home page in just 10 seconds.
- Drag and Drop capabilities.
- Recent File browser.

Release Details

Program: **Aardvark Pro HTML Editor for Microsoft Windows Platform**
Version: **2.4.2**
Released: **27 January 1997**

(C) 1995, 1996, 1997.   The Martin Group

Aardvark Pro is not freeware, we chose to release Aardvark as shareware.   Shareware is a distribution method, not a type of software.   You should find software that suits your needs and pocketbook, whether it's retail or Shareware. The Shareware system makes fitting your needs easier, because you can try before you buy. And because the overhead is lower, prices are lower also. Shareware has the ultimate money-back guarantee -- if you don't use the product, you don't pay for it.

You are granted a limited and temporary license to evaluate Aardvark Pro for a period not exceeding Fourty Five (45) days from the time you install Aardvark.   If, after that time, you choose to continue using Aardvark Pro you are required to purchase a license to do so.

For information on registering your copy of Aardvark Pro see the Registration section of this Help File.

For further information about this release or should you wish to make any comments please contact **TMG**Network at the following internet e-mail address:

webmaster@tmgnet.com

Technical Support

Support for Aardvark Pro for Windows is available to registered users via internet e-mail.

For technical support (**registered users only**) or for further information about this release please contact **TMG**Network at the following e-mail address:

webmaster@tmgnet.com

Your message subject should be in the following format :

       Aardvark Pro Support

Note: Any comments you may have about Aardvark Pro are most welcome.   Post any comments to **TMG**Network with a subject of :

       Aardvark Pro Feed Back

Special Thanks

I would like to acknowledge the contributions of the Aardvark Pro for Windows Beta Testers.

Without the efforts of these people Aardvark would not be the product it is today.

- Steve Frost
- David Hague
- Marty Alison
- Deborah Lacey
- Kevin Read
- David Walker

Thanks from the Aardvark

HTML Definition

Hyper Text Markup Language or HTML is composed of a set of elements that define a document and guide its display.

HTML is the method used to layout pages used by the World Wide Web (WWW).

Using the Home Page Wizard

The Aardvark Home Page Wizard steps you through the creation of your Home Page.

A HTML document can be considered to be made up of several distinct
sections.

> A document header and title section.
> The main body of the document, and
> A footer.

The wizard asks you for the above information as well as other design options, then automatically creates a HTML
document based upon these choices.

How to use the wizard.

Simply work your way through each section providing information and/or
selecting choices as you go.

When you have answered all questions, click on the Create button and 'Presto' there it is, your very own home page.

Commonly Asked Questions

Where is all the help ?

> The complete Aardvark help file is provided when you register your version of Aardvark.   The Registered version provides detailed instructions on the use of Aardvark as well as Hints and Tips on writing good HTML source.
