JMK JavaScript Author is here, thanks to JMK Productions - Helpfile generated by VB HelpWriter.

Requirements

JMK JavaScript Author doesn't require a killing mashine to work. A simple computer is just enough.

The following list is the minimum requirements for JMK JavaScript Author to work.

- Windows 95 or NT 3.51 or grater
- CPU: 80486/25 Mhz
- 4 Mb of memory

Also, JMK JavaScript Author requires some files, but they are all included in the zipped file and un-zipped in the WINDOWS\SYSTEM directory

JMK JavaScript Author is here, thanks to JMK Productions - Helpfile generated by VB HelpWriter.

JMK JavaScript Author

Author: **First Release Date:**

Jim JMK Batis.   1/2/1997

Reason of program's existance:

JMK JavaScript Author is an application that'll help you include JavaScripts in your HTML documents.

How much does it cost:

Nothing. All products of JMK Productions are for **FREE!!!** This is because it's FreeWare. I don't do programming to earn money. I do it because it's something I like.

What it includes:

JMK JavaScript Author includes many JavaScript objects, methods and object properties, to help you make real JavaScript functions. To help you more, there are two wizards included, so that you gain more help. The first one is the Condition Wizard, and the other is the Date / Time Wizard. JMK JavaScript Author also allows you to adjust how the program will start, and you can also preview your documents.

JMK Productions and Jim JMK Batis

What company is JMK Productions:

It is a FreeWare company, that means all of its applications are for free. Started in August 1996, three applications have been made so far. All of them FreeWare. JMK Productions applications have either to do with Internet or databases.

Applications so far:

The first one made is an HTML editor, **JMK HTML Author**. Latest edition is 3.0
The second one is **JMK Address Keeper**, a database that keeps and prints addresses. Latest edition is 1.4
The third one is the one you just use.

Who works for JMK Productions:

Jim JMK Batis

About Jim JMK Batis:

Born in May of 1982, my first experience with computers is 9 years ago. My father bought my first (and his first) computer then. It was a Spectrum 128K, and all who had a computer those days, you know that programming then was neccesary. So I had learnt programming, and could design simple and complicated shapes, and text editors. Of course, I found it difficult to understand anything that had to do with variables, so in the age of 10, I stopped programming, and I started designing MultiMedia presentations. But here I am now, programming again, being 14 years old.

Contacting Jim JMK Batis

If you have discovered a bug, want to help me, want me to help you, on anything, not only about my products, then contact me as soon as you can.

You can contact me in five different ways:

E-mailing me at: bat_geor@prometheus.hol.gr

WWW: http://users.hol.gr/~bat_geor
                                       http://www.geocities.com/SiliconValley/Heights/2102/

Sending a letter to :   Jim Batis
                                   45 Thoukididou St,
                                   Ilioupolis, Athens,
                                   163 43,
                                   Greece

Phoning me: +(30 1) 99 33 208

Faxing me: +(30 1)99 35 549

JMK JavaScript Author is here, thanks to JMK Productions - Helpfile generated by VB HelpWriter.

What do you get when registering

It costs:

A date with me (just kitting). It costs **nothing at all.**
Except if you want to register via mail or fax, then you have to give me a 3.5" disk (5.25" also acceptable).

You get:

Your name is written in a mailing list, and you receive all latest news from JMK Productions, plus **every new edition** of JMK JavaScript Author for **FREE**!!!
The mails are sent to you via e-mail or mail according to how you registered. You learn what's new, what's coming up, HTML Tricks, and more.

Registering ways:

Register via e-mail
Register by mail or FAX
No simple telephone way.

Register which program:
_____

Did you like this program...   (circle your answer)
A) A lot
B) Very much
C) It was quite good

D) Not much
E) Not at all

Notes about this program:

Thank you for registering

What's new

This is the first edition of the program, so everything's new. Here is a list of its features included:

- Condition Wizard
- Date/Time Wizard
- Start-up settings
- Previewing using Netscape or QuickView Plus
- Easy inserting-commands way
- Find function

What is JavaScript

JavaScript is a new scripting language for Web- pages. Scripts written with JavaScript can be embedded into your HTML- pages. With JavaScript you have very many possibilities for enhancing your HTML- page with interesting elements. For example you are able to respond to user- initiated events quite easily. Some effects that are now possible with JavaScript were some time ago only possible with CGI. So you can create really sophisitcated pages with the help of JavaScript. You can see many examples for JavaScript scripts on the Internet. Best you have a look at some JavaScript enhanced pages.

You can find many javaScript links in http://www.gamelan.com/

JMK JavaScript Author is here, thanks to JMK Productions - Helpfile generated by VB HelpWriter.

Tools

JMK JavaScript Author includes two special tools.

Condition Wizard

Conditions are created using the if... then... else function. This wizard simply does the writing job for you. The only thing you have to do is to name the variable, name the value or variable it must equal or be bigger or less than, and write what will happen then. And that's it!

Date/Time Wizard

The Date/Time Wizard simply adds the current date or time to your JavaScript enchanced document.

JMK JavaScript Author is here, thanks to JMK Productions - Helpfile generated by VB HelpWriter.

Previewing

Previewing your document can be done by two ways:

1) Using Netscape Navigator

JMK JavaScript Author saves the document that is proccessed right now, and then opens Netscape Navigator, asking it to show your document.

2) Using Wuick View Plus

JMK JavaScript Author saves the current document and then opens your document using Quick View Plus.

What JMK JavaScript Author does

JMK javaScript Author proccesses HTML documents, and allows you to add JavaScript commands and properties. It allows you then to save them as HTML Documents.
Since HTML Documents are in ANSI code, it's easy for JMK JavaScript Author to open and save these documents.

Inserting a new JavaScript function is easy. Simply choose the function from the menu "JavaScript".

JMK JavaScript Author is here, thanks to JMK Productions - Helpfile generated by VB HelpWriter.

Licence Agreement

By using any version of JMK JavaScript Author,   you are consenting to be bound by agreement to the following:

GRANT OF LICENCE:

JMK Productions and Jim JMK Batis, has granted you the limited licence of JMK javaScript Author. This DOES NOT includelicence to modify, translate, reverse engineer, decompile, disassemble (except to the extent applicable laws specifically prohibit such restriction), or create derivative works based on this program.

DISCLAIMER

Since all the software is free of charge, JMK Productions and Jim JMK Batis shall not be held responsible for any damagesarising from the use of the Software.   The Software is provided on an AS IS basis, without warranty of any kind, including without limitation the warranties of merchantability, fitness for a particular purpose and   non-infringement. The entire risk as to the quality and performance of the Software is borne by you. Should the Software prove defective, you and not the Company, assume the entire cost of any service and repair.

Security mechanisms implemented in the Software have its limitations and you, the user, must decide whether the Software sufficiently meets your requirements. If so, you can use the application as long as you like, as long as you follow the above rules.

DISTRIBUTING

If you wish to distribute JMK JavaScript Author anywhere, or give a version of this application to someone, no matter who he is, you must follow the following rules. If the rules below aren't violated, then you can upload, copy, inlcude in your sites or other sites the zipped file, named jmkjava.zip

You must not have as a purpose to win money. Any money that are gained, because of selling JMK HTML Author are illegal. That excludes magazines which include the complete zipped file that is distributed by me, CD-ROM which include shareware and FreeWare applications.

You distribute the whole zipped file, named jmkjava.zip, which is found at http://users.hol.gr/~bat_geor/ftp/jmkjava/jmkjava.zip

You have kept all rules that are bound by agreement to this file for each individual.

You recognize that you have no right to trespass all rules described in this document.

Aknowledgmets

There are a few people and companies I would like to thank. They really helped so that JMK JavaScript Author could be published.

Thanks to Stephan Koch, for giving me the permission to include JavaScript Intro. Thanks to Stephen La Hunte, for learning me HTML, and his great Help File, HTML Reference Library. I want to thank all the stuff of Teletech Systems, for VB helpWriter. This file wouldn't exist if they hadn't made such a terific program for Help Authoring. The icons are designed using MicroAngelo Icon Maker, by MicroAngelo. Finally, I want to thank all the stuff of Microsoft that made Microsoft Visual Basic 4.0 Pro.

Programs I used:

Microsoft Visual Basic 4.0 Proffessional
(by Microsoft)
VB HelpWriter Lite
(by Teletech Systems)
MicroAngelo Icon Maker
(by MicroAngelo)

Useful utilities that helped me a lot:

JavaScript-Intro
(by Stephan Koch)
The HTML Reference Library
(by Stephen La Hunte)
