NOTES,C,159

Size approximate.

Adds CRC error checking protocol. Not needed in latest versions.

source code. Jon Martin's Bullet6. (01-06-89).

Provides a 'call-back' facility for those BB systems which don't normally allow it.
Some on RBBS music too.

updatable. Displays BBS 'ad' graphics. Vers 1.0. (09-15-88)

Keeps track of number of bytes downloaded and uploaded. Converts user file. Compatible with RBBS 15.X?

Date approximate.

Various stats.

- requires add-in programs.

Work with latest versions?

Whatever that is.

Works with current versions?

Earlier version (?) of ENTRANC2

What versions does it work with?

Crunches by size, not by date, which would be more useful.

Replaced by MAZE30.
