1.2 Introduction

Introduction

Welcome to AMIL (Amiga Main Internet List).

This is (or at least tries to be) a full (???) listing of every (???) person - company/group - BBS - mailing list - newsgroup - zine related to the Amiga.

Let's try to make it clearer. This guide contains (1) the following :

1. People/Persons.

That includes Programmers/Coders, Music & Gfx Artists, Managers, Producers, Hardware Designers, etc.

Additional information includes E-Mail addresses, WWW addresses, IRC Nicknames-Channels, Fidonet addresses, a list of every (???) "Project" that each one of the previous persons has "created" and some notes about the person him/herself.

2. Companies/Groups.

That includes Hardware/Software Distribution Companies, Hardware/Software Development Companies, Software Houses, Programming Groups/Teams, Demo Groups/Teams, Gfx/Sfx Studios etc. Additional information includes E-Mail addresses, FTP addresses, WWW addresses, Activities and Products that are developed/distributed.

3. BBS.

4. Mailing Lists.

5. Usenet Newsgroups.

6. Zines.

That includes Zines in electronic and "printed" form. Additional information includes E-Mail addresses, WWW addresses, Editor name/e-mail etc.

(1) : Numbers 1, 2, 6 are under improvement (See Comments).

Numbers 3, 4, 5 are still under development.

I already have (stored in a database) a list of over 10 mailing lists, 10 newsgroups and a lot of BBS (thanks Danny) but that has to be first converted in a "readable" format. Ideas are welcome.

NOTE : I will try to upload a new version to Aminet every month or so, as long as this list is maintained by me.

ATTENTION

THIS VERSION IS HIGHLY EXPERIMENTAL AND INCOMPLETE

1.3 Purpose

Purpose

General purpose of this list is to provide the Amiga Community with information about every possible "PROJECT" (2) associated with this wonderful computer.

That way, you (Amiga users) can "contact" the "PROJECT" immediately and :

- request misc information
- send thanks/(b|f)lames (i hope not the second)
- send corrections/suggestions/improvements/comments
- get informed about various products
- exchange opinions

and many more i can't even think of.

(2) : The word "PROJECT" used here, refers to numbers 1 - 6 mentioned in introduction, and DOESN'T try to "lower" anyone of you.
Therefore it has nothing to do with the field "Projects :" used in the actual list.

1.5 Comments

Comments

This list cannot be expanded without the help of users/readers like you. So if you have any additional information/corrections/suggestions, PLEASE send them to me. All contributors will be credited with their email addresses unless denied by them.

Information most needed is about :

- WWW (URL) addresses of people & companies
- widely known programmers/artists
- companies/groups
- zines

NOTE1 : All submitted information can not be checked (fully) for it's validity and correctness.

NOTE2 : Contributors are requested (well, i can't force them) to submit information using the format used in this document. That way i can more easily/frequently update this list.

NOTE3 : Any grammatical/spelling corrections in this list are also welcome (you see, my spelling isn't very good).

About People/Persons list

- The list is sorted alphabetically by Country Code (ISO 3166) and by person's lastname. That offcourse doesn't mean that a person with an address like xxx.org or xxx.com or xxx.net lives to United States.
 - In case you just want to refer to a specific project (which is followed by an email address enclosed in ()) then you should use that address instead of the general one.
 - Everything that comes after a person's name and is enclosed in () usually refers to either person's company/group or person's code/nick-name.
-

About Companies/Groups list

- The list is sorted alphabetically by Company name.
- "Products :" refers to developed & distributed products.

About Zines list

- The list is sorted alphabetically by zine name.

1.13 Other Nets -> Internet

Convert addresses of other nets to addresses of Internet

Fidonet -> Internet

NOTE : If you need more nets (not just only Fidonet) just mail me.

1.14 Fidonet -> Internet

Conversion of Fidonet addresses to Internet addresses

Fidonet : zone:net/node.point (firstname lastname)
Internet : firstname.lastname@pXX.fXXX.nXXXX.zX.fidonet.org

Where : p=point (not needed)
f=node
n=net
z=zone
X=number 0-9

ex.

Fidonet : 2:292/603.10 (Nico Francois)
Internet : Nico.Francois@p10.f603.n292.z2.fidonet.org

NOTE : When you come into a name containing 3 words, most of the times that means that the first word is the firstname and the third (last) word is the lastname.
