## Amiga

### 1.1 Amiga V1.00

PureBasic Amiga library V1.00

Each Amiga has its own hardware and specification and this library will provide you with some useful information about the Amiga configuration on which your program is launched. This is useful so you can avoid crashes if the configuration doesn't fit with your needs.

Command summary:

AmigaChipSet

### 1.2 amigachipset

Syntax

Result = AmigaChipSet()

Description

Return the version of Amiga native graphic chipset:

0: OCS

1: ECS

2: AGA

---
