Routine Lists

Raster Image Routines E.1

Palette Routines E.2

Annotations Routines E.2

Scientific Dataset Routines E.3

General Purpose Routines E.4

Utility Routines E.5

Chapter 6

General Purpose HDF Routines

Chapter Overview 6.1

Introduction 6.1

Header Files 6.2

Opening and Closing Files 6.3

Finding the Next Occurrence of a Given
Object 6.4

Finding Data Descriptors for HDF Objects 6.5

Storing and Retrieving Entire Data Elements 6.6

Reading or Writing Part of a Data Element 6.8

Manipulating Data Descriptors (DDs) 6.10

Miscellaneous 6.12

Chapter 7

NCSA HDF Command Line Utilities

Chapter Overview 7.1

Introduction 7.1

hdfjs: Listing Basic Information about an
HDF File 7.2

hdfed: Editing an HDF File 7.3

Basics 7.3

Tutorial Session 7.5

hdfed with the -batch Option 7.12

fptohdf: Converting Floating-Point Data to SDS and/
or RIS8 7.12

Basics 7.12

Notes 7.14

Examples 7.14

Utilities for Working with Raster Image
Sets 7.15

r8tohdf: Converting 8-Bit Raster Images to

SDSs 4.19

Reading Parts of a SDS 4.23

How SDS Routines Store and Convert
Scientific Data 4.26

How HDF Normally Stores Arrays 4.26

How HDF Normally Represents
Numbers 4.26

DFSDsettype: Setting Scientific Dataset
Attributes 4.27

Other SDS Routines 4.28

Sample Programs 4.29

A FORTRAN Program 4.29

A C Program 4.32

Chapter **5**

Annotating Data Objects and Files

Chapter Overview 5.1

Annotation Tags 5.1

File Annotations 5.1

HDF Object Annotations 5.1

Tags and Reference Numbers 5.2

The Annotation Interface 5.3

Writing Annotations for HDF Objects 5.4

Reading Annotations for HDF Objects 5.6

Listing All Labels for a Given Tag 5.11

Writing Annotations for HDF Files 5.13

Reading Annotations for HDF Files 5.17

Getting Annotation Information from a File 5.21

A FORTRAN Program to Copy a RIS8 from One File to Another 2.23

A C Program to Convert a Raw Palette and Raw Raster Image to HDF RIS8 Format 2.23

C Functions to Convert Floating-Point Data to 8-Bit Raster Data 2.25

Chapter 3

Storing Palettes

Chapter Overview 3.1

HDF 8-Bit Palettes 3.1

Writing Palettes to a File 3.2

Reading Palettes from a File 3.3

Other Palette Routines 3.4

Chapter 4

Storing Rectangular Gridded Arrays of Scientific Data

Chapter Overview 4.1

Scientific Datasets 4.1

Reasons to Use Scientific Datasets 4.4

Header File 4.4

Writing Scientific Datasets to a File 4.4

The “Set” Routines: Preparing to Write Scientific Datasets 4.5

Writing Scientific Datasets to a File 4.8

Writing Parts of a Scientific Dataset 4.12

Restrictions on Slices To Be Written 4.15

Reading Scientific Datasets from a File 4.17

Getting the Dimensions of a Scientific Dataset 4.18

Reading an Entire Scientific Dataset 4.18

Getting Other Information About

FORTRAN Stubs	1.8
Data Type Anomalies	1.9
Case Sensitivity	1.9
Name Length	1.9
Header Files	1.9
FORTRAN 77 and K & R's C	1.10
HDF Without FORTRAN	1.10
Installing HDF	1.11
Transferring HDF Files	1.11
How to Get HDF	1.11

Chapter **2**

Storing Raster Images

Chapter Overview	2.1
Header Files	2.1
Raster Image Sets	2.1
Reasons to Use Raster Image Sets	2.3
8-Bit Raster Image Sets	2.3
Compression Schemes	2.4
Writing 8-Bit Raster Images to a File	2.5
Reading 8-Bit Raster Images from a File	2.8
24-Bit Raster Image Sets	2.15
Interlace Schemes	2.15
Compression Schemes	2.17
Writing 24-Bit Raster Images to a File	2.17
Reading 24-Bit Raster Images from a File	2.19
Sample Programs	2.23

Table of Contents

Introduction

Overview	xiii
What Is HDF?	xiii
Differences Between HDF 2.0 and HDF 3.0	xiii
Differences Between HDF 3.10 and HDF 3.0	xiv
System Requirements	xv
Use of This Manual	xv
Manual Contents	xv
Form of Presentation	xvi
Further Reading	xviii

Chapter 1

NCSA HDF Basics

Chapter Overview	1.1
What Is Hierarchical Data Format?	1.1
Why Was HDF Created?	1.1
NCSA HDF Application Software	1.3
NCSA Scientific Visualization Software and HDF	1.4
HDF Calling Interfaces	1.4
HDF Utilities	1.5
Getting Started with HDF	1.5
Examples	1.6
Writing an HDF 8-Bit Raster Image Set	1.6
Writing an HDF Scientific Dataset	1.7
FORTTRAN and C	1.8

NCSA HDF Version 3.1 source code and documentation are in the public domain. Specifically, we give to the public domain all rights for future licensing of the source code, all resale rights, and all publishing rights.

We ask, but do not require, that the following message be included in all derived works: *Portions developed at the National Center for Supercomputing Applications at the University of Illinois at Urbana-Champaign.*

READ ME NOW

If you want to see more software like NCSA HDF, you need to send us a letter, email or US mail, telling us what you are doing with NCSA HDF. We need to know: (1) What science you are working on—an abstract of your work would be fine; and (2) How NCSA HDF has helped you, for example, by increasing your productivity or allowing you to do things you could not do before.

We encourage you to cite the use of NCSA HDF, and any other NCSA software you have used, in your publications. A bibliography of your work would be extremely helpful.

NOTE: This is a new kind of shareware. You share your science and successes with us, and we can get more resources to share more software like NCSA HDF with you.

NCSA Contacts

Mail user feedback, bugs, and software and manual suggestions to:

NCSA Software Tools Group
