### To Begin...

This freeware package contains a flowchart about mythology, society and the individual. It is accompanied by document that briefly expands upon each of the themes in the flowchart. I hope you enjoy them and find the material thought provoking. The flowchart file is socindv.wri and the document file is mythpoet.wri.

Reality Software publishes software packages that explore various themes in the history of religion and mythology in considerable depth. Several on-disc flyers will introduce these studies as well as an historical timeline for the period 10,000 B.C. to 900 A.D.

The flowchart was written with RFFlow, a terrific flow charting program for Windows. It was then saved as a metafile and converted to Windows Write format (.wri). Obtaining a complete printout from Windows Write will be tricky. The flyers were written with WPWIN and then converted to Windows Write format (.wri). After unzipping your BBS file, simply copy all files to your Windows directory. Sharehlp.wri contains procedures for decompressing and accessing .zip files.

File list for this package:

celtreg.wri; chjapreg.wri; intbrgrg.wri; mythpoet.wri; sharehlp.wri; socindbg..wri; socindvv.wri; timereg.wri; whgdsreg.wri
