

**Delphi Gourmet
FormSaver Component
Version 1.01 - Trial Copy**

Program and Documentation
Copyright 1995 Scott Samet
Compuserve: 70671,213
Internet: 70671.213@compuserve.com

Without a single line of code, your application can start with its windows in the exact location the user last left them. Just drop a Delphi Gourmet FormSaver Component on your form and you're finished. Every time your application exits, the form will save its size, location and state in an INI file. Next time the program runs, it will appear exactly the way the user left it. FormSaver works with all form styles: normal, MDI parent, and MDI child.

This is a fully functional trial copy. You can install it on the Delphi Component Panel and try it in your applications. Except for the source code, it includes everything you receive with the registered version, plus as a free bonus <g> you'll get a reminder dialog each time you start a program compiled with the trial copy.

Read the GFORMSAV.WRI file for full details on Delphi Gourmet FormSaver, including installation, use, registration and support.

Trial License:

Program and documentation Copyright 1995 Scott Samet. You are welcome to distribute the trial version, as long as it's a complete, unmodified copy of the full package. You may not distribute applications (EXE files) that include the trial version.

Expiration:

The trial version includes an expiration date that clearly displays on the opening dialog. There is no sinister purpose here. The only reason is to get obsolete versions out of circulation. **Paid versions NEVER expire.**
