Chapter 1

Devices

1.1 A / IFF Source Code / IFF Include Files

This section contains a variety of source code listings showing how to use IFF files in applications. All of these programs require the new `iffparse.library` included with Release 2.0 of the Amiga operating system (Kickstart V36 and greater). There are four parts:

- * IFF Include Files. These have been updated to be compatible with the `iffparse.library`.
- * Link modules which provide convenient IFF handling routines such as `showilbm.c`.
- * Example programs showing how to use the link modules.
- * Stand-alone utility and example programs.

IFFP_Modules.README

Makefile.SAS	8svxapp.h	debug.h	ilbmapp.h
Makefile.Manx	amiga.h	iff.h	packer.h
8svx.h	compiler.h	ilbm.h	smus.h
