

Bugs;¬BackSpace Bugs?

I'm not aware of any bugs in BackSpace, though specific modules may have bugs. Bug reports are always welcome; you can send bug reports, screen saver modules, suggestions, and chocolate to **backspace@NeXT.com**. I'm pretty busy so I won't promise I'll actually do anything with your missives, but you might get lucky.

Thanks;¬Thank you!

Lots of people provided excellent suggestions that shaped BackSpace, and many people provided useful code snippets. Thanks to all who contributed, and thanks too to the many who provided support in the early days.

Thanks in particular go to Lennart Lovstrand who is largely responsible for dynamically loaded modules, and Ali Ozer whos examples provided the early structure for this app (and the foundation of my AppKit knowledge). Scott Hess' Background program provided some early ideas, too. Thanx everyone!
