

# Calculus Using Mathematica

Keith D. Stroyan

This directory contains 3 sample Mathematica notebooks from the book **Calculus Using Mathematica** by Keith Stroyan:

1. A Notebook on Symbolic Differentiation
2. A Notebook on the idea of Integration
3. A Notebook on the idea of Differentiation in 1 and 2 variables

This package is designed for the three-semester calculus course offered at all major undergraduate institutions. The text is ideal for the small, yet developing segment of the mainstream market that uses technology for the purposes of symbolic manipulation and graphic representation. **Calculus Using Mathematica** is the first text to integrate the use of mathematical software, rather than relegating its mention to a variety of supplements that accompany the primary text.

Paperback/Software: \$29.95 (tentative)

August 1992, c. 700pp./ISBN: 0-12-672970-0\*

\*Software available for IBM, Macintosh, and NeXT Computers.

**Ordering Information:**

Call Toll Free 1-800-321-5068 or Fax 1-800-336-7377

Monday-Friday, 8:30 a.m. to 7:00 p.m. Eastern Time

Free shipping and handling with prepaid orders.

Visa, Mastercard, and American Express accepted or send check or money order to:
