

# MiscTree woodfilter

358755\_PixelRule.tiff ↗

Lets you filter in trees saved in the \*.tree format of the MiscKit examples.

For example:

Tree Name

Root

Node 1

Node 1.1

Node 1.1.1

Node 1.1.2

Node 1.1.3

Node 1.2

Node 1.3

Node 2 has this longer label.

Node 3 has this label.

Node 3.1

Node 3.2

Node 3.2.1

Node 3.2.2

Node 3.2.3

Node 3.2.3.1

Node 3.2.3.2

Node 3.3

Node 3.4

Node 4 has a label

produces:

paste.eps ↗

Choose a .tree file from the Open Panel that appears. The tree will be added to the selected node.
