

Change Tree Style

358755_PixelRule.tiff ↵

With the Tree inspector (Command 0) you can change the general appearance of the tree. The Tree Inspector appears only if you select the root node of the tree in your document.

paste.tiff ↵

Distance Parent-Node and Border-Width refer to the two parameters which define the compactness of a tree.

For a definition of these parameters see
;../Basics/TreesInWood.rtf;↵.

The edges of a tree have two forms.

388468_12ptHevBlk.tiff ↵ The middle form: the edge is one line segment connecting the middle points of the two nodes.

739941_paste.eps ↗

182242_12ptHevBlk.tiff ↗ The outside form: the edge is a multiple line segment connecting the middle points of the two nodes. The slider on the right lets you adjust the form of the multiple line segment.
