The MiscKit was used in development of this software

The original idea comes from Bernd Wild, who found the article by Sven Moen in the publication   of IEEE Software, July 1990. The article describes an excellent algorithm for drawing trees developed by Sven Moen which uses an approach of fast approximation of the contour of a subtree.

Wood uses a lot of ideas, a few buttons and some Help text   from Diagram!™   by Lighthouse Ltd.

ScrollViewDeluxe and UndoManager are written by Jeff Martin.

The floating panel   class was originally written by Ulrike Mueller.

Helpful suggestions and   bug reports   have been   received from the c.s.n.* Internet community, with special mentions for

Michael Friendly, Thomas Engel, Hiro Yoshida,
Erwin Achermann,   Moritz Willers, Detlev Droege and
Darcy Brockbank.
