# Bugs

**COWS Version 1.3**

**Sean Luke**

**March 20, 1994**

- ◆ After using the IPC library, upon exiting a called-upon application, the calling application bombs. I'm still trying to figure out what's wrong with Distributed Objects here, but I'm afraid I don't know. Can anyone help out?
- ◆ Bad values in the "for" special form properly result in errors, but the *wrong* errors.
- ◆ The IPC library doesn't support synchronous communication to background interpreters.
- ◆ Memory leaks still unchecked. Interpreter still slow.
- ◆ Interpreter is not reentrant, which may cause problems with any up-and-coming COWS compiler.
