

Known problems

(ClassEditor v0.4)

438886_paste.tiff ↵

TaskArrowSm.tiff ↵ Too many flaws are in there. Consider it as pre-alpha. 481918_TaskArrowSm.tiff ↵ If you find something that crashes the app please tell me. 617030_TaskArrowSm.tiff ↵ A complete list of all the known bugs can be found inside the *Release Notes* of the documentation.

Thank you.

291955_PixelRule.tiff ↵

391386_CheckMark.tiff ↵ Will only work correct if all the files conform to the documented style requirements.

735576_CheckMark.tiff ↵ The method browser popup can only bring up the cheat window, but no other browsing view.
This will be fixed with the next major release.

408913_CheckMark.tiff ↵ Most settings can only be adjusted by hacking the apps defaults form the outside. But be careful !
If you messed up the Defaults deleting them should always get you back into a stable mode.

457413_CheckMark.tiff ↵ Using the "New" menu item would crash

the app. Leave it disabled.
