The MiscKit Project

Don Yacktman's MiscString has a lot of work here...but other Misc-ObjectWare is use too.

Code Colorizing

Glen R. Diener's code colorizing code is what brings the pretty source to you.

Nice BrowserCell

The RZBrowserCell project by Ralph Zazula did really get the nice GUI going.

Vertical Resizing

Adjusting the two browsers has gotten quite simple with the SideSplitView by Mary McNabb.

Frustration

NeXT for providing only Edit as an editor for an OO-system. But ProjectBuilder 4.0 should bring us back into

the OO-heaven. Sounds like a really cool app.

Special Thanks

To everybody offering me a place to stay.
