

# Release notes

(ClassEditor v0.4)

438886\_paste.tiff ↵

TaskArrowSm.tiff ↵ Here is a partial list of the features this application has. 229874\_TaskArrowSm.tiff ↵ The basic idea was to make it simpler to write documentation and not to have to worry about all the different files. With NeXTSTEP 4.0 on the horizon it might even be a "Request For Discussion". Let's start talking about features you want, on the c.s.n.\* newgroups. Maybe someone at NeXT can get new ideas from there too.

84846\_TaskArrowSm.tiff ↵ For further details please read the *Release Notes*.

291955\_PixelRule.tiff ↵

220329\_CheckMark.tiff ↵ Open a *.m*, *.h* or *.RTF* file and this ClassEditor will try to open all the other files for you by using some possible search paths.

782826\_CheckMark.tiff ↵ Browse through the methods and see the corresponding documentation. Both can be edited in place.

613165\_CheckMark.tiff ↵ Add method references to the *See Also* sections of your docu by a simple drag&drop action.

383442\_CheckMark.tiff ↵ Save the changes inside every file with one save request.

877761\_CheckMark.tiff ↵ Edit all three files inside one view. Add new methods or instance variables here. You can use Emacs keybindings.

796245\_CheckMark.tiff ↵ Use the "Style" menu and panel to select

the right fonts for the documentation and source.

187441\_CheckMark.tiff ↗ Should work as advertised.

SimpleSmiley.tiff ↗

53781\_PixelRule.tiff ↗
