

```
//
// FILENAME: InfoController.h
// SUMMARY: Header for the InfoController class, runs the Info menu
// SUPERCLASS: Object:InfoController
// PROTOCOLS: None
// INTERFACE: InfoController.nib
// AUTHOR: Rohit Khare
// COPYRIGHT: ©1993,94 California Institute of Technology, eText Project
//
// Description
// Just a stub. Displays a static info panel. It's a separate class and
// .nib for encapsulation and efficiency reasons. Eventually, this class will
// support a cool animation and a full complement of Easter eggs.
//
// HISTORY
// 09/21/94: Revamped for eText5; renamed InfoController
// 08/18/93: Created as InfoPanel
//
// Imported Interfaces
//
// #import <appkit/appkit.h>
//
// @interface InfoController:Object
// {
//
// Instance Variables
//
// Panel *iPanel;
// Panel *cPanel;
// TextField *vField;
// }
//
// Class Management
//
// - init;
//
// Actions
//
// - showInfo;
// - showCopyright;
//
// @end
```
