

```
//
// FILENAME: Accessory.h
// SUMMARY: Obligations of loadable Accessories.
// SUPERCLASS:None
// PROTOCOLS: <Accessory>
// INTERFACE: Entry on the Tools menu
// AUTHOR: Rohit Khare
// COPYRIGHT: ©1993,94 California Institute of Technology, eText Project
//
// Description
// The new protocol is to specify a target and action that will be
// directly passed to the menucell upon Registration.
// This is for loading arbitrary tools and commands into the UI.
// Examples: HotLinks, Choose HTML Encoding, Convert All...
//
// HISTORY
// 10/23/94: Obsoleted by "new" protocol
// 10/22/94: Created for eText5
//
// Imported Interfaces
//
// #import <appkit/appkit.h>
//
// @protocol Accessory
//
// - activate:sender;
//
// @end
```
