

Preferences command

734786_PixelRule.tiff ↵

635168_paste.tiff ↵

Opens a panel that you can use to set preferences for new Edit documents.

You can choose to have new documents open as either plain text (ASCII) or RTF (Rich Text Format) files. You can choose a standard font for either of these types of documents. You can also choose to work in developer mode, with features for working with programming code.
