

Save another version of a document

3PixelRule.tiff ↗

- 01_12ptHevBlk.tiff ↗ Choose File from the main menu.
- 02_12ptHevBlk.tiff ↗ Choose the Save As command from the File menu.
- 03_12ptHevBlk.tiff ↗ In the Save panel, name the new version and open the folder you want to put it in.
- 04_12ptHevBlk.tiff ↗ Click OK.

1PixelRule.tiff ↗

CheckMark.tiff ↗ You can save the contents of a document with a different name and in a different folder while keeping the original document. For example, you may want to save one version of a document before making any more changes to it.

6560_CheckMark.tiff ↗ The Save As command saves the contents of the buffer you're working in as another file. It opens the Save panel, where you name the new version of the file and put it in a

folder. The original file stays the same as when you last saved the window's contents.

Note: This command performs a M-x write-file in emacs.
