

# Set Emacs preferences

9993\_PixelRule.tiff ↗

166998\_12ptHevBlk.tiff ↗ 752945\_paste.tiff ↗ Info from the main menu. 01\_12ptHevBlk.tiff ↗ Choose Preferences from the Info menu. 02\_12ptHevBlk.tiff ↗ Choose the preferences you want in the panel. 03\_12ptHevBlk.tiff ↗ Click Set.

664730\_paste.tiff ↗

357723\_PixelRule.tiff ↗

172630\_CheckMark.tiff ↗ You can choose to have Emacs be the default open app which means, the next time you log in double clicking a file with an unknown extension will be opened in Emacs. If you want Emacs to be the default open app for say ".m" files, you should select a ".m" file in the workspace and press Command-3 to get the Tools inspector. You can then set Emacs to be the default tool.

49418\_CheckMark.tiff ↪ font;↪You can tell Emacs to hide on autolaunch. Emacs will then hide itself (;HideEmacs.rtf;;↪ Hide Emacs) if you autolaunch it from the application dock.

923683\_CheckMark.tiff ↪ You can change the font spacing to fit more lines of text in the Emacs window.
