

Sending;␣Save As command

873268_PixelRule.tiff ↵

864980_paste.tiff ↵

Opens a panel that you can use to save a new version of the file you're working on and close the original.

You type a name for the new file, which replaces the original one in the current buffer. Any changes you made to the original file since it was last saved appear only in the new file.

305136_PixelRule.tiff ↵
