

The NameList... Panel

Click on NameList... in the inspector window to edit the choice of bouncing names.

NameBrowser;¬The Usernames Browser

The left-hand side of the **NameList...** panel is dominated by the usernames browser, which presents a list of all of the user accounts in the root netinfo directory. Users are added or deleted from the NameList by double-clicking them in the scrolling browser.

MagicNames;¬"Magic" Names

The check boxes on the right hand side of the NameList... panel enable or disable the display of the **Time**, **Day**, **Date**, or **Hostname**, respectively. The colors of the calendar names change from red to blue as they span 24-hours, 7-days, and 30 days respectively. Note that the calendar functions are only updated when mail is checked, so if you only check mail every 5 minutes, the clock will only be that accurate (see **Checking Mail**;Settings.rtf;¬).
