Spew!

466871_paste.tiff ¬

BackSpace module written by Pedja Bogdanovich
<pedja%luka@umiacs.umd.edu>.

SpewView uses Greg Smith's spew program.

Installation

542493_paste.tiff ¬

1. Uncompress the file SpewView.compressed from the Workspace.   This will make a single directory SpewView/ with all the sources.

2. From a shell, cd SpewView, and type ªmakeº to compile the module.

3. To install the module in ~/Apps/Backspace.app, type ªmake installº.   To install it elsewhere, for example in /LocalLibrary/BackSpaceViews, type ªmake install INSTALLDIR=/LocalLibrary/BackSpaceViewsº.

About Spew

Spew BackSpace module generates and displays National Enquirer-like headlines.

Permission is granted to freely use and distribute this software, both Greg Smith's `spew` and my `SpewView`, provided this notice is left attached and no monetary gain is made.

`spew` source code can be found on `wuarchive.wustl.edu`.
