

Saving mixes

When you finally want to save a mix, instead of hitting the **play button** go to the **documents** submenu and select the **Write mix to disk** option. It will prompt you for a soundfile name and verify the conditions of the mix. What will be written to disk is exactly what you would have heard had you hit the **play button** at that time. It's up to you to make sure you have enough disk space. (hint: learned the hard way--if you fill up your disk **don't** try to save your **rt** script, it will just write an empty file.)
