

SoundPlayer+ V1.00 Readme

This is ObjectWare's first ShareWare product. After much thought I have decided not to cripple the product and release it as straight ShareWare. If you like SoundPlayer+ why not try Cookie, a program of similar quality. In the SoundPlayer archive you should find.

- ReadMe.rtf, This file
- Manual.wn, The Manual

- SoundPlayer+, the program
- ni.svx, a demo sound file

The manual is written using WriteNow so forgive some of the typographical errors, it's the best WriteNow can do, *GRIN*. Also WriteNow does something quite horrible to the illustrations when you save the PostScript out, so the manual is in .wn format rather than PostScript. Very un-3.0.
