

Thanks!

First I should give some conceptual credit to Iannis Xenakis and the UPIC folk; Marcos Novak for impetus to unite the visual with the musical; David

Jaffe for the endless tricks, musical and cybernetic, that he shared with me earlier this year -- in this particular case, his thread wisdom that I gleaned from another application: Pvc, that we wrote in May. Dick Moore for the oscillator bank code, thanks again! Julie Zelenski for Help help, and Bruce Blumberg for the TextView savior. And of course, Paul Lansky for supporting my whole music work context -- his RT code was a handy model

too. Thankyou Thankyou.
