

-currentMode	Returns the color picker's current mode (or submode, if applicable). The returned value should be unique to your color picker. (NSColorPanel.h. defines unique values for the standard color pickers used by the Application Kit.)
-supportsMode:(int)mode	Returns YES if the receiver supports the specified picking mode.
-provideNewView:(BOOL)firstRequest	Returns the view containing the color picker's user interface. This message is sent to the color picker whenever the color panel attempts to display it the argument indicates whether this is the first time the message has been sent. If firstRequest is YES, the method should perform any initialization required (such as lazily loading a nib file).
-setColor:(NSColor *)aColor	Adjusts the color picker to make aColor the currently selected color.
