

(id)getValue:(void \*)value

Copies the receiver's data into value.

nonretainedObjectValue

Returns the non-retained object that's contained in the receiver. It's an error to send this message to an NSValue object that doesn't store a nonretained object.

(const char \*)objCType

Returns the Objective C type of the data contained in the receiver.

(id \*)pointerValue

Returns the value pointed to by a pointer contained in an value object. It's an error to send this message to an NSValue that doesn't store a pointer.

(CGPoint)pointValue

Returns the point structure that's contained in the receiver.

(CGRect)rectValue

Returns the rectangle structure that's contained in the receiver.
