)init
Initializes and returns an NSNotificationQueue object that uses the default notification-center object.

)initWithNotificationCenter:(NSNotificationCenter *)notificationCenter
Initializes and returns an NSNotificationQueue object that uses the notification-center object specified in notificationCenter.

id)dequeueNotificationsMatching:(NSNotification *)notification
   coalesceMask:(unsigned int)coalesceMask
Removes all notifications from the queue that match the notification's attributes as specified by coalesceMask. The mask (set through NSNotificationCoalescing constants) can specify notification name, notification sender, or both name and sender.

id)enqueueNotification:(NSNotification *)notification
   postingStyle:(NSPostingStyle)postingStyle
Puts a notification in the queue that the queue will post to the notification center at the time indicated by postingStyle. The notification queue posts in all runloop modes, and it coalesces only notifications in the queue that match both the name and sender of notification

id)enqueueNotification:(NSNotification *)notification
   postingStyle:(NSPostingStyle)postingStyle
   coalesceMask:(unsigned int)coalesceMask
Puts a notification in the queue that the queue will post to the notification center at the time indicated by
